

Sheraz Gul

Q) What years were you at Titus Salt?

2004-2012.

Q) Which A Levels did you do?

Chemistry, Biology, Geography, and Maths AS Level.

I completed my Maths A Level in the first of two gap years, when I also worked in a dental practice and as a classroom assistant, and did voluntary work for Cancer UK.

Q) What are you doing now?

I'm a fourth-year dental student at Queen Mary University of London. It's a brilliant degree. The theory is heavy, but last year I worked in a clinic and treated patients for real.

Q) Any advice for our current students?

It pays to be patient and persistent.
